

2021 PROJECT HIGHLIGHTS

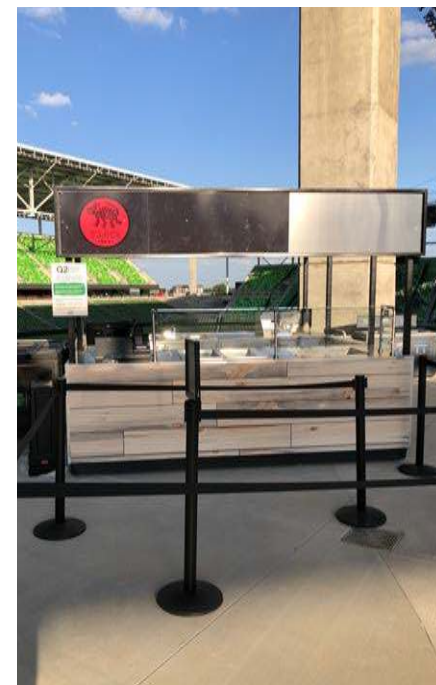

2021 was the year of perseverance.

At Gallery, we continue to prove our dedication to delivering for our clients. We are focused on moving forward and forging new paths through the consistently altering systems and protocols to align with the challenges everyone is facing. We are developing strong partnerships across the industry and maintaining well-rounded internal teams to prevent current supply chain issues from affecting our ability to deliver products on time to the client. We continue to set the bar across the industry, supported by a strong foundation of solution-oriented sales directors, creative engineers and designers, a reliable production team, and attentive customer service reps.

We value all of our partnerships across the industry and continue to build on them to offer innovative solutions to our clients. In 2021, we expanded our partnerships to further support client interest in electric vehicles. Our partnership with Element Fleet Management allows us to offer tailored end-to-end fleet solutions, from sourcing, financing, and ordering, to billing, maintenance, cost savings, and even remarketing at the end of the lease term. Our partnership with OnCampus Brands helps us connect with foodservice operators and brands who are looking for ways to enhance the lives of students, staff, and school administrators on campuses across the country. Come visit us at a number of the NACAS and NACUFS events throughout 2022 and learn more about how Gallery's electric vehicle can generate extra revenue and enhance brand awareness.

Throughout 2021, our entire team remained dedicated to ensuring we deliver the highest quality mobile food and retail products, provide the best service to our clients, and stay within budget. The lineup here showcases the wide array of campuses, event centers, venues and brands we have worked with in 2021. Now more than ever we appreciate our clients' resilience and dedication to working with us to find creative solutions to today's challenges. Although we know there will be more hurdles to come, we are excited to continue to support our clients in any way.

Q2 STADIUM PORTABLES

DESIGN FEATURES

- CORRUGATED METAL SIDING
- 3D SIGNAGE
- SELF CONTAINED PLUMBING

PROJECT SCOPE

17 FOOD CARTS,
